Most require some sort of registration, but some of them let you use your existing login information, making them easier to use. This list is a summary of some of the most popular sites. Screenshot: ADVERTISEMENT This page is to help you discover the most effective ways to create and manage your collection of images on a web server. This article describes the different methods available and answers many of the questions that you may have about how to use Flickr, and some of the alternatives to Flickr. The term "Flickr" refers to a web photo service operated by Yahoo, Inc. The Yahoo! Photo Sharing site is the primary page for uploading and browsing photos. You can sign up for a free Yahoo! account at this site, and sign up for a free Flickr account there, as well. Once you sign up, you can use Flickr for free; however, most of the services on the site require registration. Getting your photos from your camera into the Flickr site is covered in more detail in [Tutorial]. Starting with a working account Flickr can be found at To sign up for a Flickr account, enter the username of your choice and select the password. In the next screen, enter your e-mail address and set the level of privacy you want for the photos you upload. There is currently no option to restrict access to photos by email addresses. Enter the username and password that you want to use for your account, and click Continue. You may now receive an e-mail confirmation of the account. If you're prompted to agree to the terms of service, click OK to agree, then click OK again to start the setup process. The interface The main area of the interface is the Map. Click on the Map icon to get an overview of the photos you have uploaded. If you look at the list of photos, you can click on any of the photos to see the description, tags, and comments that were added when the photo was uploaded. There is a photo manager in the top left of the window. This provides links to the photos
